# AVIATION GRADE CAST ACRYLIC FOR CLARITY UNDER PRESSURE.

### New Wording:

Aerospace & Motorsport  
Specialist Engineering  
Components

SACAA-approved (MP39) fabrication of cast acrylic windows, windscreens and transparent enclosures for certified and non-pressurised aircraft, plus high-performance composite components for aerospace and motorsport.

### New Wording:

SACAA-approved (MP39) blanket approval for all certified and NTCA unpressured fixed- and rotary-wing aircraft types. ACES Aerodynamics delivers precision-engineered transparencies and composite components for aviation and motorsport.

SACAA-approved (MP39) fabrication of cast acrylic windows, windscreens and transparent enclosures for certified and non-pressurised aircraft, plus high-performance composite components for aerospace and motorsport.

Remove

DENEL

CSIR

SAFAIR

SAA

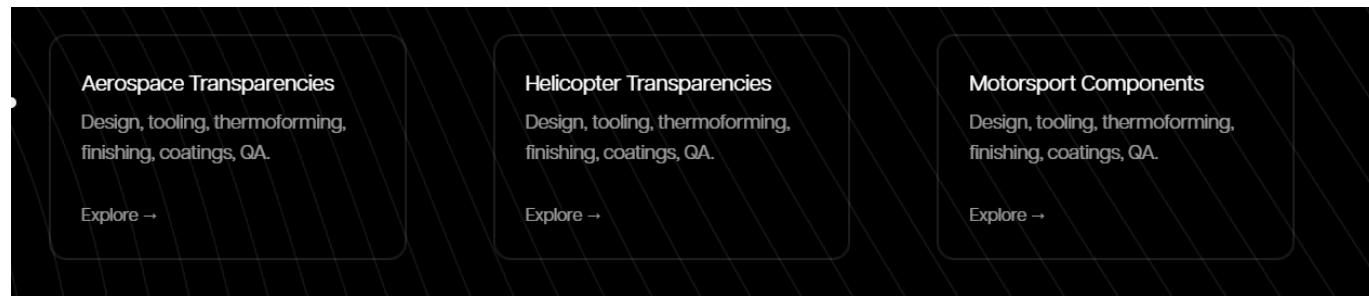

PARAMOUNT

Move to bottom page just above footer,

New labels with different businesses will be sent.

Until then, needs to be dormant

## Navigation: Section 2

Replace this with this, I want to keep the effects of these windows (Mouse disappears over sections – Correct) (when pressed block turns white can be removed)

### PRODUCTS AND SERVICES

#### Aircraft Transparencies

All Certified and Uncertified  
Unpressurised Aircraft Types

Windows | Windshields | Side Windows

#### Helicopter Transparencies

All Certified and Uncertified  
Unpressurised Helicopter Types

Canopy | Bubble | Side Windows

#### Motorsport Components

Saloon | Rally Racing Windows  
NACA Ducts  
Headlight Lenses  
Sliding Windows

#### Aerospace Components

Wing Tips | Elevator Tips | Rudder Caps  
Wheel Spats | Strut-Cuffs | Tail Cones  
Cowlings | Fairings

#### Prototyping

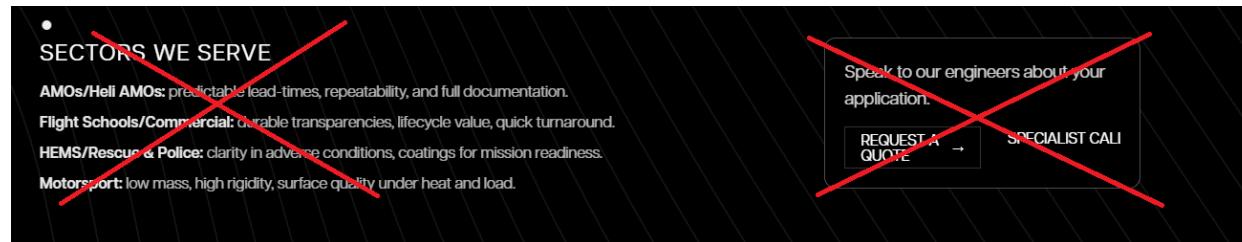

Prototype Component Development to  
meet your needs & specifications  
Project Advice & Consultation Services

#### Retrofitting and Reverse Engineering

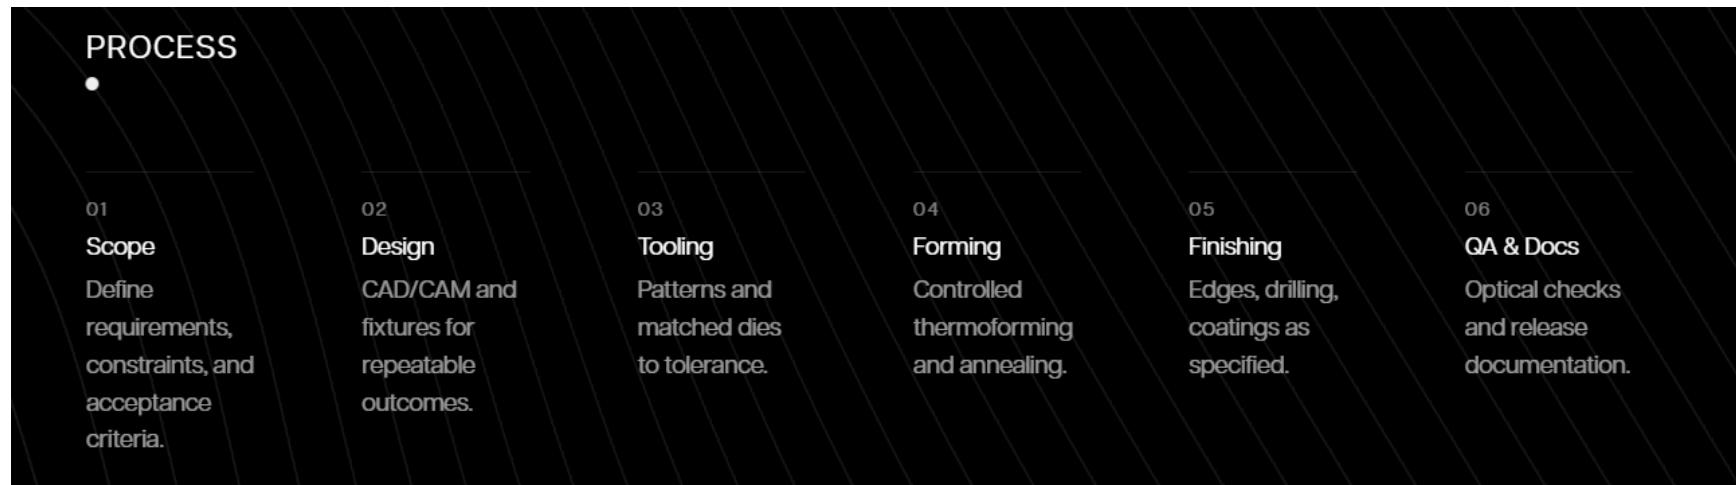

Discontinued Aircraft Windows and  
Composite Components to restore with  
Precision and Certification.

## Navigation: Section 3

Move this up to under Products and Services Section:

### OUR THREE STEP PROCESS

01	02	03
<b>Scope</b> Define requirements, constraints, and acceptance criteria.	<b>Production</b> Robust processes, repeatable quality, flight-ready windows.	<b>QA, Documentation, Delivery</b> Optical checks and release documentation delivered with pace.

## Navigation: Section 4

**COMPLIANCE & QA**  
SACAA-approved (MP39). Documented process control with full traceability and optical inspection. Our release documentation accompanies every shipment.

- VLT  $\geq$  90%\*
- Haze  $\leq$  2.0%\*
- Scratch-resist. per spec
- Traceability docs
- QA release per lot

\*Representative; per material system and thickness. See release docs.

This section is now the next section after Three Step Process – replace with this

Replace with this:

### **COMPLIANCE AND QA** (Fix heading formatting issue)

Documented process control with full traceability and optical inspection. Our release documentation (CA21-19 airworthiness approval tag) accompanies every shipment.

**MP39 - SACAA Approved**

**CA21-19 Airworthiness Approval Tag**

**Proven Quality - 99.9% First Pass Yield Rate**

**Effortless Compliance**

Ensure that the windows are transparent like previous (use same animations as previous windows)
